

OUR SOLUTION

With our kanban solution we can provide all the necessary racking, storage bins and new labels at no extra cost. In addition to this we offer a reactive delivery service for any other items that you might require or to cater for any unexpected spikes in usage.

Our vending machines can be placed onsite to manage all consumable items from PPE to engineering tools. This allows for 24/7 access, controlled operator access and is proven to reduce consumption.

YOUR BENEFITS

- **Save Money**

Avoid costly stock outs and downtime situations, reduce panic buying and one-off purchasing. Consolidate your supply chain and reduce admin procedures.

- **Save Time**

Eradicate lead times as stock can be managed to never run short. Strategically have your solution in the optimal location to reduce the time it takes to access parts. Minimises time taken on stock takes.

- **Stock Visibility**

You can track low stock levels and identify the re-order points for each product, in turn avoiding the occurrence of stock-outs. Helps identify obsolescence and reduce the amount of stock required.

- **Utilise Data**

Use the data provided to strategically plan your stock around future projects or fluctuations throughout the year. Get to understand which department uses what and to what levels creating better business intelligence.

- **Create Space**

Transform a disorganised work space into a streamlined operation through tailor-made storage solutions. The space created can be utilised in a more productive way.

WHAT'S NEXT

1. One of our team will perform a site visit and assess the best solution for your business.
2. Working with this information and data we will provide you with our recommended min/max levels based on the usage.
3. We get to work on setting up your solution. For our kanbans this includes unique barcodes and bespoke labelling identifying the contents of the bin. For our vending machines this includes creating user access and permissions along with product groups.
4. Soon after we will arrange to install the solution on site.
5. Once in place we can provide reports and data on everything from usage down to the individual, cost savings and future trends.
